- 1** The Flux OSKit: a substrate for kernel and language research 92%

Bryan Ford , Godmar Back , Greg Benson , Jay Lepreau , Albert Lin , Olin Shivers
ACM SIGOPS Operating Systems Review , Proceedings of the sixteenth ACM symposium on Operating systems principles October 1997
 Volume 31 Issue 5
- 2** U-Net: a user-level network interface for parallel and distributed computing 87%

(includes URL)
 T. von Eicken , A. Basu , V. Buch , W. Vogels
ACM SIGOPS Operating Systems Review , Proceedings of the fifteenth ACM symposium on Operating systems principles December 1995
 Volume 29 Issue 5
- 3** Fast detection of communication patterns in distributed executions 85%

Thomas Kunz , Michiel F. H. Seuren
Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research November 1997
 Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...
- 4** Microkernels: a submodule for a traditional operating systems course 85%

Tracy Camp , Glen Oberhauser
ACM SIGCSE Bulletin , Proceedings of the twenty-sixth SIGCSE technical symposium on Computer science education March 1995
 Volume 27 Issue 1
- 5** The PRIM system: An alternative architecture for emulator development and use 83%

Joel Goldberg , Alvin Cooperband , Louis Gallenson
